

SPARK® Media: Clinical

A comprehensive suite of solutions to empower patients and enable healthcare professionals to deliver an excellent level of care and education.

Clinical Access

SPARK® Media: Clinical can integrate with your clinical solutions using PAS integration and/or HL7 integration, enabling clinicians to show the patient key information about their health journey. Staff can also use it to access the patient's records and clinical systems. This is available on verified Trusted hardware only.

**Improve patient experience
and enhance bedside care**

Patient Dashboard	Enable patients to stay up to date with their care journey with approved medical advice, information about the Trust and guidance on how what they can manage themselves during their stay.
Remote Access	Trust-owned devices can integrate with clinical applications
PAS Integration	Provide direct access to the Patient Admission Service on Trust-owned devices.
